Flex beta 3 is now available for download from [Adobe Labs](#). Download new versions of Flex Builder, Flex Data Services, Charting, Flash Player, the ColdFusion/Flex connectivity bits, and the sample applications.

The ColdFusion updater updated ColdFusion to 7.0.2. In addition to the Flex connectivity features, the updater also includes other goodies, including an updated reporting engine, a fix for ColdFusion generated Flash to address the IE EOLAS update, and more. Damon Cooper has [posted](#) details.
